PROFESSIONAL SUMMARY

IT and Information Technology graduate with professional internship experience in full-cycle web application enhancement and CRM/e-commerce platforms. Proven capability in frontend development utilizing Angular and Tailwind CSS, with a solid technical foundation spanning .NET, PHP, and SQL database management. Experienced in translating user requirements into functional systems, implementing Dark Mode, resolving UI architecture jitters, and executing system migrations aligned with clean code principles. Dedicated to delivering scalable, user-centric web solutions and eager to contribute to enterprise system performance and digital workflow automation.

EDUCATION

Kasetsart University, Sriracha Campus

June 2022 – April 2026

Bachelor of Science in Information Technology GPA 3.36 Good Study Award & Very Good Oral Presentation Award

SKILL

- Programming & Full-Stack Development: JavaScript, TypeScript, HTML, CSS, .NET, PHP, Python, Rust, C, Kotlin, Node.js, Web Application Development (Frontend & Backend), Frameworks: React, Angular, Vue.js, ERP Systems, Debugging, System Testing, Troubleshooting, Figma
- Database, Tools & Platforms: SQL (Oracle SQL, SQL Server, PostgreSQL, MySQL), Firebase, Docker, Data Mapping, Query Optimization, Oracle E-Business Suite, SQL Developer, Visual Studio Code, Android Studio, Git (basic), Production Deployment, API Integration
- Business & Professional Skills: User Requirement Analysis, System Design, UI/UX Design, Stakeholder Collaboration, Problem Solving, Analytical Thinking, Communication, Adaptability, Time Management, Attention to Detail, Logical thinking

EXPERIENCE

Gofive

Apr 2025 - Apr 2026

Internship Developer

- Collaborated in an Agile (Scrum) team to enhance CRM and e-commerce platforms using Angular and Tailwind CSS.
- Improved user experience by implementing Dark Mode, resolving UI jitter, and integrating interactive feedback components.
- Optimized system reliability by fixing complex rendering bugs, data validation logic, and HTML formatting issues.
- Executed System Migration of legacy components to a Micro Frontend architecture, ensuring alignment with the modern Design System and Clean Code principles.

PROJECTS

ScoopHub (E-commerce Ice Cream Platform)

2025

- Developed a full-featured online ice cream shop using PHP and MySQL.
- Built a complete e-commerce workflow, including a dynamic product catalog, shopping cart system, and order tracking.
- Managed database schema for inventory control, user accounts, and secure transaction records.

VillaReserve (Village Facility Booking System)

2024

- Developed a facility reservation platform for housing estates using Angular, .NET, and SQL Server.
- Engineered a real-time scheduling system with automated conflict resolution to prevent double-bookings.
- Built an administrative dashboard for village management to monitor usage quotas and approve requests.

Namkub (Water Distribution & E-commerce Platform)

2023

- Developed a full-stack e-commerce platform for water product distribution using Angular and Node.js (Express) with MSSQL.
- Built a highly responsive and intuitive user interface featuring a dynamic product catalog, real-time shopping cart management, and a streamlined multi-step checkout workflow.
- Implemented Reactive Forms for robust data validation and Angular Services to ensure efficient state management and seamless integration with RESTful A
